

## Exercise: Creating the Wishlist Table

In this exercise, you'll practice the model-first approach by changing the domain model and creating a new Flyway migration using JPA buddy.

- Define a many-to-many relationship between the **User** and **Product** entities. Use the `@JoinTable` annotation to set the name of the join table to **wishlist**.

- Create a Flyway migration using JPA buddy. After applying the migration, you should have the wishlist table in your database as follows.
